

Ideas for Guildford Skatepark Re-Development 2010

Dimension are approximate, but to scale. i.e. this is approximately the correct size for the park and ramps, etc., are to scale. The main purpose for this is to get an idea about what we can fit into the park, and to promote discussion about what we do and don't want. It shouldn't be considered a "proper" design at this stage. -- Andy Wardley
